Executive Summary

In 2021, NSRIC Green Supplies Inc. (NGS) was established with the aim of supplying goods and services in the global export, import, supply chain, and logistics sectors. NGS is registered in Canada and located in Toronto, Ontario (ON), Canada. NGS is a subsidiary organization of the NSRIC Group. NGS is more than just a company. We are a team of dedicated professionals with a passion for global trade. Our foundation is built on integrity, expertise, and a commitment to delivering high-quality products and services.

We specialize in sourcing, supplying, and facilitating transactions for various commodities, with a primary focus on petroleum oil and gas products, as well as other commodity items. Our services extend to related industries, enabling us to offer a comprehensive one-stop solution for businesses seeking trusted trade intermediaries.

We operate with a seller-side model, which means we work closely with reputable refineries and sellers, as well as mills and industries, ensuring that our buyers receive premium products at a competitive price. We also offer free consulting services to the relevant buyers and buyers' agents. Our extensive global network and decades of deep industry knowledge allow us to handle every aspect of trade facilitation, from contract negotiation to secure payment processing and timely delivery. With decades of combined experience in global trade among our team, NGS has established itself as a reliable partner for businesses seeking to expand their operations in the international market. We bring expertise, efficiency, and a commitment to ethical business practices that set us apart from the competition.

CEO's Message

M. Enamul Hossain

CEO, NSRIC Green Supplies Inc.

I am delighted to welcome you to NGS, a trusted and innovative partner in the global petroleum, oil and gas, agricultural, food supply, and commodity industries. Our objective at NGS is to streamline international trade by establishing a secure, transparent, and highly efficient process that connects verified end buyers and sellers. Excellence is our top priority, and we ensure that every transaction is handled with integrity, precision, and professionalism.

The values of the NSRIC Group, founded by me with the goal of promoting sustainable solutions through education, science, engineering, and ethical business practices, are embodied by NGS. With more than 30 years of experience globally in international business, academia, research, administration, and the petroleum industry, I have been fortunate enough to hold senior positions at renowned organizations such as Memorial University of Newfoundland, Dalhousie University, King Fahd University of Petroleum and Minerals, Sultan Qaboos University, American University in Cairo, Saudi Aramco, Statoil, Jamuna Oil, and several others worldwide.

Throughout my career, I have focused on advancing sustainability in the energy sector, resulting in 11 U.S. patents, 10 authored books, and over 200 scientific publications. I have secured more than USD 16.9 million in international research funding, which has significantly contributed to innovation and environmental responsibility in the oil and gas industry.

NGS reflects our commitments to responsible leadership, global collaboration, and sustainable growth in global business. We aim not only to facilitate successful trade transactions but also to foster long-term relationships rooted in trust, reliability, and shared success.

I personally invite you to partner with NSRIC Green Supplies Inc. and experience the excellence, integrity, and forward-thinking approach that define our organization.

About Us

Introduction

NSRIC Green Supplies Inc. (NGS) is a dynamic and trusted reseller, sourcing partner, and consulting service provider specializing in petroleum oil and gas, grains, commodity items, and gold trade transactions.

As a licensed and professional Canadian organization, we ensure smooth, secure, and efficient transactions between end-sellers, end-buyers, and their authorized agents. Our mission is to facilitate seamless and profitable smooth operations while upholding the highest standards of professionalism, transparency, and operational excellence.

Expanding beyond petroleum, oil, and gas, NGS has broadened its expertise to include agricultural and food products, grains, coal mining, the bentonite industry, and other high-demand commodity sectors. This diversification enables us to deliver comprehensive, multi-sector trade solutions to our global partners, positioning NGS as a reliable and influential player across various industries.

At NGS, we are driven by excellence, reliability, and a commitment to customer satisfaction. Our thirty-plus years of experience work strategically to connect the right buyers with the right sellers, ensuring secure transactions, efficient processes, and long-term business partnerships. We prioritize transparency, ethical practices, and sustainable growth, empowering us to create a meaningful and lasting impact on every sector we serve.

Vision

To be the world's most trusted and efficient partner in high-value global commodity trade, setting the standard for secure, transparent, and sustainable intermediary services.

Mission

Our mission is to ensure seamless, secure, and profitable exportation processes for every client. We achieve this by leveraging deep market expertise, a robust global network, and an unwavering commitment to fostering enduring, mutually beneficial long-term partnerships.

Why Choose Us

Partners choose NGS because we transform complexity into certainty.

01

Guaranteed Security: Our licensed status and strict due diligence protocols ensure every transaction is secure, verified, and legally sound.

02

Unrivaled Expertise: We provide specialized market knowledge that few general trading houses can match, leading to more favorable contracts and reduced transaction friction.

03

Dedicated Partnership: Our emphasis is on building long-term partnerships. We are not merely transaction handlers; we are strategic advisors committed to sustained profitability for our clients.

04

Seamless Execution: From securing the initial contract to final delivery and payment settlement, we ensure the exportation process is seamless, enabling you to focus on your core business goals.

Our Services

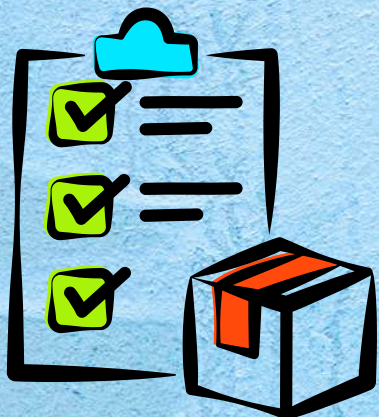

A Licensed Service Provider

As an authorized and licensed service provider, we connect verified, legitimate end buyers with verified, reliable source sellers. Additionally, we operate as a seller, offering a diverse range of products.

Process Security

Our rigorous management of the transaction pipeline involves ensuring that all financial instruments (including DLC, SBLC, BCL, PG, etc.) and logistical arrangements comply with rigorous international security protocols.

Logistics & Documentation

To ensure on-time delivery and flawless adherence to contract specifications, it is essential to manage complex customs, shipping, and regulatory compliance effectively.

Market Intelligence

Assisting clients with current analysis and strategic guidance on pricing and market trends in the petroleum, oil and gas, commodity, and agricultural industries.

Our Company Values

Our core values are the basis of who we are and how we conduct our business at NGS. Our services, partnerships, and global community are guided by these principles, which ensure transparency, trust and excellence.

HONESTY

Honesty at NGS goes beyond simply telling the truth.

It reflects our genuine commitment to our clients, partners, teams, and shareholders about who we are, what we stand for, and what we aim to deliver. Every service we provide is rooted in this fundamental value.

TRANSPARENCY

Transparency is the mirror of our vision. We believe in clear, direct communication that flows both ways between NGS and our valued clients, employees, and partners.

Our operations uphold the highest standards of integrity, ensuring clarity and confidence at every stage.

MUTUAL RESPECT

Mutual respect is the foundation of our mission. By valuing every individual and stakeholder, we minimize conflict, foster stronger relationships, and cultivate a positive working environment. This respect strengthens our communication, supports our transparency, and enhances collaboration.

RESPONSIBILITY

Responsibility is the path to trust. At NGS, we take accountability seriously, whether it involves our services, decisions, or promises to clients. We encourage our people to take ownership of their goals, actions, and growth, creating a culture where success is shared and sustainable.

Our Company Values...

TEAMWORK

Honesty at NGS goes beyond simply telling the truth.

It reflects our genuine commitment to our clients, partners, teams, and shareholders about who we are, what we stand for, and what we aim to deliver.

Every service we provide is rooted in this fundamental value.

COMMITMENT

Transparency is the mirror of our vision.

We believe in clear, direct communication that flows both ways between NGS and our valued clients, employees, and partners.

Our operations uphold the highest standards of integrity, ensuring clarity and confidence at every stage.

Petroleum Products

Aviation Kerosene JP54 Jet Fuel

Aviation Kerosene JP54 (Jet Fuel) is a high-quality, clean-burning fuel designed for jet engines, providing reliable performance and efficiency in aviation operations.

Aviation Turbine Jet A-1

Aviation Turbine Jet A-1 is a high-quality kerosene-based fuel designed for jet engines and turbine-powered aircraft, offering reliable performance in extreme temperatures.

Aviation Kerosene TS-1 (GOST 10227-86)

Aviation Kerosene TS-1 (GOST 10227-86) is a high-quality jet fuel used in aircraft engines, known for its low freezing point and high combustion efficiency.

Jet Fuel A

Jet Fuel A high-quality aviation fuel designed for turbine engines, ensuring optimal performance and reliability.

Petroleum Products

Aviation Turbine Jet A1 Fuel 91/91

Aviation Turbine Jet A1 Fuel 91/91 – high-quality, refined kerosene fuel designed for jet and turbine engines, ensuring optimal performance and safety.

D2 Gas Oil Euro 4 (50 PPM) GOST 305-82

D2 Gas Oil Euro 4 (50 PPM) GOST 305-82: Low-sulfur diesel fuel meeting Euro 4 standards, suitable for high-performance engines.

EN590 ULSD 50 PPM

EN590 ULSD 50 PPM: Ultra-low sulfur diesel fuel with a maximum sulfur content of 50 ppm, designed for cleaner combustion and reduced emissions.

EN590 Ultra Low Sulfur Diesel (ULSD) 10 PPM

EN590 Ultra Low Sulfur Diesel (ULSD) 10 PPM – High-quality diesel with ultra-low sulfur for cleaner combustion and reduced emissions.

Petroleum Products

D6 Virgin Low Pour Fuel Oil (VLSFO)

D6 Virgin Low Pour Fuel Oil (VLSFO) is a high-viscosity, low-pour, heavy fuel oil used mainly in large industrial engines and marine vessels, offering stable performance and efficient combustion in cold environments.

Heavy Crude Oil

Heavy crude oil is a thick, viscous type of petroleum with high density and impurities, requiring advanced refining processes to produce usable fuels.

Bonny Light Crude Oil

Bonny Light Crude Oil: A high-quality, light, and sweet crude oil from Nigeria, prized for its low sulfur content and ease of refining into gasoline and diesel.

Intermediate Fuel Oil (IFO-380)

Intermediate Fuel Oil (IFO-380) is a heavy marine fuel used in ships' engines and industrial boilers, known for its high viscosity and energy content.

Petroleum Products

Liquefied Natural Gas (LNG)

Liquefied Natural Gas (LNG) is natural gas cooled to a liquid state at around -162°C , making it easier and safer to store and transport over long distances.

Liquefied Petroleum Gas (LPG)

Liquefied Petroleum Gas (LPG) is a clean-burning fuel made from propane and butane. It is commonly used for cooking, heating, and powering vehicles because it burns efficiently and produces low emissions.

Gasoline Octane 87

Regular unleaded fuel designed for standard engines, providing reliable performance and efficient everyday driving.

Gasoline Octane 89

Gasoline Octane 87 is a regular unleaded fuel designed to provide reliable performance and efficient combustion for most standard vehicles.

Petroleum Products

Gasoline Octane 95

Gasoline Octane 95 is a high-quality fuel designed to provide smoother engine performance, better efficiency, and reduced knocking for modern vehicles.

Petroleum Coke (Pet Coke)

Petroleum Coke (Pet Coke) is a carbon-rich solid material produced during oil refining. It's mainly used as fuel and in industrial processes due to its high energy content.

Urea (Prilled & Granular)

High-quality prilled and granular urea fertilizer for efficient nitrogen supply and improved crop growth.

Base Oil SN150

Base Oil SN150 is a light, solvent-neutral mineral oil used as a primary ingredient in lubricants, offering good viscosity, stability, and performance for automotive and industrial applications.

Petroleum Products

Bitumen 80/100

A medium-grade bitumen used in road construction and waterproofing, known for its durability and adhesive properties.

Bitumen 50/70

A medium-penetration paving bitumen used in road construction and asphalt mixtures, providing durability, flexibility, and water resistance.

Bitumen 60/70

A medium-penetration paving bitumen commonly used in road construction and asphalt mixtures, offering good durability and flexibility.

Bitumen 30/40

Medium-penetration paving bitumen used in road construction, providing durability and flexibility in asphalt mixes.

Coal Products

PCI Coal (Pulverized Coal Injection)

PCI Coal (Pulverized Coal Injection) is a high-energy, low-ash coal used in blast furnaces to replace expensive coke, improving efficiency and reducing production costs in steelmaking.

Steam Coal

A type of coal primarily used for generating steam in power plants and industrial boilers. It has high carbon content and burns efficiently to produce heat energy.

Sub-bituminous Coal

A type of coal with lower carbon content and higher moisture than bituminous coal, primarily used for electricity generation due to its relatively low energy density and cleaner burning compared to lower-grade coals.

Thermal Coal

A type of coal primarily used for electricity generation in power plants due to its high energy content.

Coal Products

Anthracite Coal

A hard, shiny, high-carbon coal that burns clean with very little smoke and produces intense heat. It is the highest grade of coal.

Anthracite Fines

High-carbon, low-ash, low-moisture crushed anthracite coal used for industrial fuel, filtration media, and specialized heating applications.

Bituminous Coal

A soft, black coal with high carbon content, commonly used for electricity generation and steel production due to its good heat and energy output.

Coking Coal (Metallurgical Coal)

Coking Coal, also known as Metallurgical Coal, is a high-quality coal used primarily in steel production. It is heated in the absence of air to produce coke, a key ingredient in steelmaking.

Edible Oil Products

Refined Corn Oil

A pure, light, and healthy cooking oil made from high-quality corn. Ideal for frying, baking, and everyday cooking with a neutral taste and high nutritional value.

Refined Peanut Oil

A clean, light, and neutral-tasting cooking oil made from premium peanuts, refined for high purity, long shelf life, and excellent performance in frying and everyday cooking.

Refined Olive Oil (Premium)

Smooth, pure, and high-quality olive oil perfect for everyday cooking, frying, and dressing. Light in taste, rich in goodness.

Refined Soybean Oil

A pure, light, and healthy cooking oil made from quality soybeans. It has a neutral taste, high smoke point, and is ideal for frying, baking, and everyday cooking. Rich in essential fatty acids and vitamin E.

Edible Oil Products

Sunflower Oil

A light, heart-healthy cooking oil made from sunflower seeds, known for its mild flavor and high vitamin E content.

Walnut oil

High-quality, nutrient-rich oil extracted from premium walnuts perfect for cooking, skincare, and overall wellness.

Rice Bran Oil

A light, heart-friendly cooking oil made from the outer layer of rice grains. It has a high smoke point, mild flavor, and is rich in antioxidants, making it ideal for frying, sautéing, and everyday cooking.

Coconut Oil

Pure, natural oil extracted from fresh coconuts ideal for cooking, skincare, and hair nourishment. Rich in healthy fats and antioxidants.

Rice Products

Basmati Rice

Long-grain, aromatic rice known for its delicate flavor and fluffy texture when cooked.

Arborio rice

Arborio rice is a short-grain Italian rice known for its high starch content, giving dishes like risotto a creamy, chewy texture.

Glutinous rice

A sticky, chewy variety of rice commonly used in Asian desserts and savory dishes.

Carnaroli rice

Carnaroli rice is a premium Italian short-grain rice known for its firm texture and high starch content, making it ideal for creamy risottos.

Rice Products

Wild Rice

A nutritious, whole-grain seed with a nutty flavor and chewy texture, rich in protein, fiber, and antioxidants. Often used in soups, salads, and side dishes.

Japanese Rice

Short-grain, sticky, and slightly sweet rice, perfect for sushi and traditional Japanese dishes.

Brown rice

Whole grain rice with the bran and germ intact, rich in fiber, vitamins, and minerals; healthy and nutritious.

Jasmine Rice

Fragrant long-grain rice with a soft, slightly sticky texture, perfect for Asian dishes.

Wheat Products

Hard Red Winter Wheat

A high-protein, versatile wheat grown in cold climates, ideal for bread, rolls, and all-purpose flour. It offers strong gluten, rich flavor, and excellent baking performance.

Hard Red Spring Wheat

A high-protein wheat variety known for its strong gluten quality, ideal for making bread, rolls, and premium baked goods.

Soft Red Winter Wheat

A versatile, low-protein wheat grown in cool climates, ideal for making cakes, cookies, pastries, and other soft baked goods.

Durum Wheat

Durum wheat is a hard, high-protein wheat variety commonly used to make pasta, semolina, couscous, and specialty breads. It has a rich golden color and excellent cooking quality.

Sugar Products

ICUMSA 45 Refined Sugar

A highly refined, sparkling white sugar with very low impurity levels. It is the most demanded grade globally for food, beverage, and industrial use.

ICUMSA 100 White Crystal Sugar

Lightly refined white sugar used in bakeries, confectionery, and general food production. Known for its consistent quality and purity.

ICUMSA 150 Raw White Sugar

A semi-refined sugar with a light golden color. Suitable for industrial processing and further refining.

Brown Sugar

Naturally molassed sugar offering rich flavor and moisture, ideal for confectionery and bakery products.

Lentil Products

Brown Lentils

A high-protein, versatile wheat grown in cold climates, ideal for bread, rolls, and all-purpose flour. It offers strong gluten, rich flavor, and excellent baking performance.

Green Lentils

A high-protein wheat variety known for its strong gluten quality, ideal for making bread, rolls, and premium baked goods.

Red Lentils

A versatile, low-protein wheat grown in cool climates, ideal for making cakes, cookies, pastries, and other soft baked goods.

Black Lentils (Beluga Lentils)

Durum wheat is a hard, high-protein wheat variety commonly used to make pasta, semolina, couscous, and specialty breads. It has a rich golden color and excellent cooking quality.

Gold Products

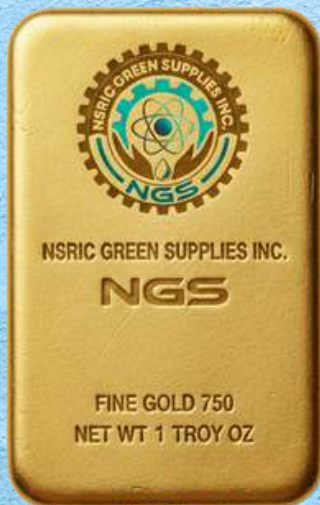

24K Gold (Pure Gold)

24K Gold (Pure Gold): 100% pure, naturally lustrous gold, ideal for investment and fine jewelry.

22K Gold

22K Gold – Pure, high-quality gold with a rich, vibrant yellow hue, ideal for jewelry and investment.

18K Gold

18K Gold: Premium gold with 75% purity, known for its rich color, durability, and elegant shine.

14K Gold

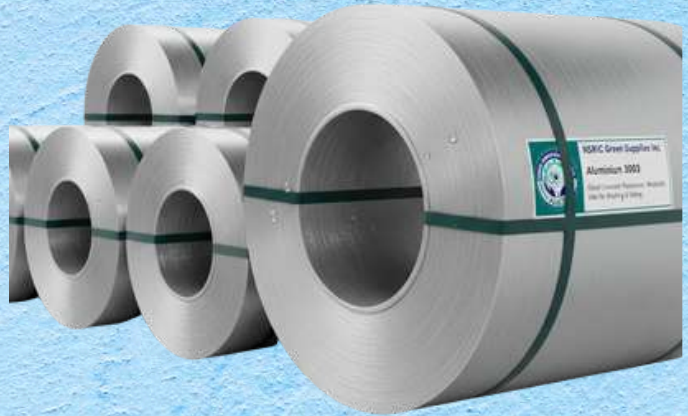

14K Gold: Durable, high-quality gold with 58.3% pure gold content, ideal for jewelry.

Aluminium Products

Aluminium 1100

Aluminium 1100: A highly pure, soft, and corrosion-resistant aluminium alloy, ideal for applications requiring excellent formability and good corrosion resistance.

Aluminium 3003

Aluminium 3003: A corrosion-resistant alloy with excellent strength and formability, ideal for roofing, siding, and marine applications.

Aluminium 5052

Aluminium 5052: A corrosion-resistant, marine-grade alloy with excellent formability and moderate strength, ideal for sheets, panels, and marine applications.

Aluminium 6061

Aluminium 6061: A versatile, lightweight alloy known for excellent corrosion resistance, good mechanical strength, and ease of machining and welding, widely used in aerospace, automotive, and structural applications.

Bentonite Products

Sodium Bentonite

Sodium Bentonite: A natural clay that swells in water, forming a thick, absorbent gel. Commonly used in drilling, sealing, and as a binder.

Calcium Bentonite

Calcium Bentonite: A natural clay known for its strong absorbent properties, often used for detoxification, skincare, and healing purposes.

Magnesium Bentonite

Magnesium Bentonite: A natural clay rich in magnesium, known for detoxifying, soothing, and nourishing the skin and body.

Potassium Bentonite

Potassium Bentonite: A natural clay rich in potassium, known for its high absorption, swelling properties, and use in agriculture, drilling, and industrial applications.
