BUYER

- **Phase III: Financial & Banking Infrastructure Setup** — Structuring secure cross-border payment rails, including Documentary Letters of Credit (DLC/SBLC via SWIFT MT700/MT760 rails), alignment with RBI Purpose Code 1006 compliance, and GIFT City IFSC escrow and clearing accounts.
- **Phase IV: Origin, Refiner & Specification Locking** — Verifying exact commodity parameters (such as HS Code 150790 for Refined Soybean Oil or energy/metals specifications), securing manufacturer allocations, and locking in binding pricing.
- **Phase V: Tri-Nodal Telemetry & Physical Logistics Command** — Mobilizing independent quantitative and qualitative inspections via SGS / Saybolt, maritime supply chain control via Honor Logistics, and real-time orbital satellite transit tracking via Kpler from origin port to discharge port.
- **Phase VI: Fiduciary Settlement & Integration** — Automated, secure advisory fee disbursement through Clause 46 of the Letter of Credit, ensuring zero out-of-pocket advance risk and guaranteeing that the delivered output is fully integrated and worthy of the buyer's input cycle.

2. Bridging the CIF Capacity Gap & Eliminating Spot Dumping

Many global buyers opt for standard CIF terms out of necessity—facing a timely lack of internal financial capability, logistical infrastructure, and maritime capacity. However, traditional CIF deals suffer from critical flaws where product custody randomly changes hands without independent oversight. PPSM bridges this gap by wrapping CIF structures in our institutional risk architecture.

Furthermore, in open spot markets, unmonitored transactions are frequently used as dumping grounds for corrupted or degraded goods. PPSM entirely neutralizes this threat through rigorous origin vetting and independent assays, ensuring what the product stands for on paper translates into absolute physical reality.

3. The PPSM Trident: Sovereign Risk Assurance

PPSM secures your transactions from origin to final settlement by enforcing three uncompromised pillars:

- **Absolute Predictability** across every stage of the global trade lifecycle.

- **Capital Protection** through forensic compliance and secure banking rails (including GIFT City IFSC and RBI Purpose Code 1006 clearing frameworks).
- **Uncompromised Fiduciary Execution** across all global trade corridors, guaranteeing the integrity of our output so that it is worthy of seamless integration into your industrial or commercial input.

We do not participate in vulnerable spot gambles or blind shipping blind spots. We architect absolute trade certainty.
